

Project: MDAS

#1

As a product owner, I need to be able to review data and recollect all the information used for the research.

Given a MDAS II PO

When accessing the data in a read only mode can

Then review and recollect 100% of the information for research purposes

#2 As a product owner, I need to be able to generate a list of 10 sectors and no more than 100 industries classifications group under the sectors with related companies weighting from collected data by running no more than two commands.

Given a MDAS II PO

When creating and updating data by running no more than two commands can

Then list of 10 sectors and no more than 100 industry classification group under the sectors with related companies

#3

As a product owner, I need to be able to review classifications using an infinite scroll HTML web page.

Given a MDAS II PO

When reading/updating classifications utilizing web page

Then should be able to scroll infinitely

#4

As a DevSecOps engineer, I need to be able to stand up entire infrastructure using 100% automated scripts with a minimum number of commands.

Given MDAS II DevSecOps engineer

When building an infrastructure environment at 100% automated scripts with a minimum number of commands

Then the infrastructure environment should work utilizing less than four commands and return 100% automated scripts

#5

As a data scientist, I need to be able to have an infinity scroll infographic to view the raw data.

Given a MDAS II Data Scientist

When reading/updating raw data via a graphical representation

Then should be able to scroll infinity
